

Mentee:

Prof. d-r Aneta Hristova-Popovska

Theme:

“Architectural Autonomy – Reflections of the New Urban Paradigms on the Public Buildings Typology”

This theme questions the relations of the public buildings with the city generated by the current political and socio-economical trends that delegitimize the modernist paradigm.

The research objective is, to discover the different aspects that redefine the /paradoxical/ state of the notion of public buildings TYPE /classes/ in architecture and their various interpretations that re-establish the ARCHITECTURE OF THE CITY.

The research study case will be defined according to the candidates' proposition /program, location, city/.
